

This exhibition of artworks by Roisin Fitzpatrick – Artist of the Light®, with the Consulate General of Ireland New York, is in collaboration with the Irish American Heritage Museum.

Roisin Fitzpatrick is one of Ireland's leading contemporary artists. She creates her art at her beautiful Victorian seafront home, on the outskirts of Dublin. After a near-death experience from a brain aneurysm, Roisin turned this adversity into a positive, life-changing experience and was inspired to create a series of contemporary artworks. Roisin's primary intention is to share the bliss and beauty of this light through the art, creating a sense of well-being in both residential and corporate environments.

Roisin also draws on the wisdom of her Celtic heritage for inspiration. Using natural silks and fine crystals to maximize the reflection and refraction of light, Roisin's art fuses light and imagery, creating an entirely unique medium. Each artwork expresses beautiful, intricate patterns with simple elegance.

The exhibition provides a contemporary interpretation of different aspects of light. It illustrates the interconnectedness of light throughout all of life, from pre-Celtic art to nature, to the stars in astronomy and intertwining this with the mythology of the Tuatha de Danann – the 'shining ones' or 'people of the speckled light'. Roisin's artworks have been acquired by leading European and US art collectors including Mark Burnett TV producer of *Oprah's All Stars*, *Survivor* and *The Apprentice* and Roma Downey, the actress best known for her work in *Touched by an Angel*. Roisin's artworks are also at Richard Branson's new resort and at Fitzpatrick's Hotels in the New York area. She has been invited as a guest speaker at the United Nations SRC Enlightenment Society, New York and Trinity College Dublin. Her artwork was the stage setting for the Conscious Capitalism Conference held at Bentley University in May 2011.

Roisin Fitzpatrick has had several exhibitions at galleries, where she is represented, in Soho and Chelsea in Manhattan. Roisin has also exhibited at the New York Art Expo and the Royal Dublin Society art shows. Roisin has been granted US copyright for over 400 of her designs and shares her art under the trademark of Artist of the Light®.

Roisin is a graduate of Trinity College Dublin and

the University of Geneva, Switzerland. She previously worked for the United Nations, European Commission and European Bank for Reconstruction and Development.
